

Health Forms & Information

Health forms

We are once again partnering with CampDoc to provide electronic health records for our campers and staff. CampDoc has helped us to consolidate and integrate camper health information into a centralized and secure location. The security, confidentiality and privacy of your camper's personal health information will always be protected. CampDoc.com site is secure, encrypted and password protected. You will receive a notification email when your 2018 health profile has been created. New families will need to follow the instructions to create an account. Returning camper families will receive an email indicating that their camper's profile is incomplete and you will be prompted to log into app.campdoc.com using the same login information as last year. You will need to complete the electronic health record, (including uploading a camper photo, front and back photo of insurance cards, immunization records and medication forms) by May 1. Alerts will appear for any missing required information. You may return to app.campdoc.com at any time to make changes/updates to your camper's health information before camp begins. Please contact the CampDoc Help Desk with any CampDoc related questions. Help Desk hours are Monday-Friday 8am-5pm EST. The Help Desk can be reached via telephone by dialing (734) 636-1000 or via email at help@campdoc.com.

Insurance

All campers must have proof of insurance on file. Please upload the front and back of your camper's insurance and prescription cards when submitting your health forms. Short-term insurance coverage may be available to you, depending on the state you reside in, through our local agent: A.B. Gile, Inc. at (603) 643-4540 / (800) 462-9919. If your child sees a doctor during the summer, your insurance company will be automatically billed by the provider. Any prescription charges, not covered by insurance, will be billed to your camper's store account. In addition to standard health insurance, you may choose to purchase Travel Insurance through CampDoc, or through another company of your choosing. We will forward all bills to international families. Please pay provider directly and then submit bills to your insurance company.

Immunizations

Immunization records should be uploaded when submitting your health forms. In order to protect the camp community from the possible spread of especially contagious illnesses, The Aloha Foundation requests that campers and counselors come to camp [fully immunized](#). In order to maintain the general health of the community, any camper diagnosed at camp with an especially contagious illness, including but not limited to, pertussis (whooping cough), diphtheria, meningococcal disease, measles, mumps, rubella or chicken pox, will be quarantined upon diagnosis and will return home as soon as possible thereafter.

Tuberculosis testing

Campers from any country on the WHO list for high incidence of TB must submit proof of a negative TB test, dated within six months of camp.
