

2022 Covid-19 Vaccine Policy

The Aloha Foundation requires all participants, staff, and volunteers at our five summer programs (Aloha, Hive, Lanakila, Horizons, and Ohana) to be vaccinated against COVID-19. This policy extends to the Aloha and Hive Reunion and Hulbert's programs for children and families.

The number of vaccine doses required will vary depending on the person's age, the date they started their vaccine series, and the type of vaccine received.

The Aloha Foundation's vaccine requirements are based on current CDC guidelines and we will continue to follow the guidelines of the CDC and determine the timing of further policy amendments as and when they occur:

- Ages 4 and under: no vaccine available (*Children who turn 5 shortly before camp should begin their vaccination series as soon as possible and may continue attending camp while waiting to receive their 2nd shot.*)
- Ages 5-11 (Pfizer vaccine): total of 2 doses (*Children who are vaccinated at age 11 and turn 12 before camp should receive a booster if it's been five months since their second shot.*)
- Ages 12-17 (Pfizer vaccine): total of 2-3 doses (*3rd "booster" vaccine required if it's been at least five months since their 2nd shot*)
- Ages 18+ (Pfizer or Moderna): (*3rd "booster" vaccine required if it's been at least five months since their 2nd shot*)
- Ages 18+ (Johnson & Johnson): total of 2 doses, with 2nd dose being Pfizer or Moderna
- International Participants: Individuals who received vaccines other than Pfizer, Moderna, or Johnson & Johnson should email their vaccine cards to our enrollment team at enrollment@alohafoundation.org for review.
